

Subprogram for the Promotion of International Scientific Cooperation

ACI_PLAN E (section d)

Research projects aimed at increasing international cooperation in translational stem cell research

Scientific Report (2009 Call)

Project title:

Spanish principal investigator:

Beneficiary entity:

Foreign researcher:

Institution:

PROJECT SUMMARY (please provide summary also in Spanish)

SUMMARY (150-300 words)

--

PROJECT SUMMARY (Spanish)

Título del Proyecto:

Resumen (150-300 palabras)

2. BACKGROUND AND HYPOTHESIS OF THE PROJECT

Summarize the history and current state of scientific and technical knowledge in the area of the proposed project, and explain on this basis, where appropriate, the hypothesis on which the proposed project is based (maximum 2 pages).

3. OBJECTIVES

List briefly, but clearly and precisely, the project's concrete objectives, explaining this particular project's pertinence (maximum 1 page).

4. INTERNATIONAL COOPERATION

Explain why international collaboration is necessary to achieve the project's goals, indicating the resources and benefits this collaboration will bring to the Spanish research group (maximum 1 page).

5. WORK PLAN

Detail and justify the work plan and methodology, including a time schedule for the proposed activities (maximum 4 pages).

- The work plan should be broken down into activities or tasks, setting milestones to be achieved in each of them and attaching a timetable for the proposed activities.
 - For each of the tasks, the institution and the people responsible for carrying out each task should be named, specifying clearly both the Spanish applicant's and the foreign collaborator's contributions to the global project.
-

6. RESULTS AND BENEFITS

Highlight the expected results and benefits of the project and provide a description of the dissemination plan, and the plan for exploiting the project's results (maximum 1 page).

7. THE RESEARCH TEAM'S EXPERIENCE

Indicate both the Spanish team's and the foreign collaborator's prior experience in the area of the project (maximum 2 pages).

- If the project is a continuation or an expansion of a previously financed project, describe clearly the objectives and results already achieved.
 - If the project addresses a new topic, explain how the background and previous contributions of the participants render the new project feasible.
-

8. THE RESEARCH TEAM'S FINANCING

Detail, for both the Spanish research team and the foreign collaborator, participation in projects, financed by public and private entities, which are related to the proposed project.

Title of the project or contract	Relation to the present application (1)	Principal investigator	Grants awarded or applied for	Funding institution and project reference	Period of the grant or application date (2)
			EUROS		

(1) Fill in 0,1,2 or 3 according to the following: 0 = it is the same topic; 1 = it is loosely related; 2 = it is somewhat related; ; 3 = unrelated.

(2) Put G if it is an awarded grant, A if it is a grant applied for.

9. HIRING AND TRAINING PERSONNEL

If you wish to use grant funds to hire or train personnel, explain clearly the need to do so and which project-related tasks this personnel will carry out, as well as the length of the contract or the training.

10. BUDGET

The applying Spanish research team must give a detailed budget of the costs attributable to the project, justify them adequately and break them down into the budget items given below, as well as by participating research groups and entities.

Budget items

- (a) Personnel
 - (b) Equipment
 - (c) Consumables
 - (d) Subcontracting services
 - (e) Travel, room and board
 - (f) Other expenses (including training research team personnel)
-
