

**CONSOLIDER-INGENIO 2010
CONVOCATORIA 2008
PROYECTOS QUE SUPERAN LA PRIMERA FASE**

Referencia: CSD2008-00001

Título: Signal transduction in fungi: morphogenetic and adaptative responses

Referencia: CSD2008-00004

Título: Microbial Comparative Genomics

Referencia: CSD2008-00005

Título: The Spanish Ion Channel Initiative

Referencia: CSD2008-00006

Título: Instruments and methodologies to analyze and fabricate nano-mechanical and electronic devices based on functional materials

Referencia: CSD2008-00007

Título: The Age of the Rights

Referencia: CSD2008-00010

Título: Foundations and Methodologies for Future Communication and Sensor Networks

Referencia: CSD2008-00012

Título: From Nature to Laboratory Design: Advanced Tools for Catalytic Asymmetric Synthesis

Referencia: CSD2008-00013

Título: Interactivity of plasmid modules and the genomes of bacterial pathogens

Referencia: CSD2008-00014

Título: Synthetic Biology of cell division: reconstructing the bacterial division machinery in the test tube

Referencia: CSD2008-00015

Título: Human Nature, Evolution and Diversity

Referencia: CSD2008-00019

Título: Chemical Pollution and Environmental Health (ecosystems, bioresources and humans included)

Referencia: CSD2008-00023

Título: Surface functionalisation of material for high added value applications

Referencia: CSD2008-00025

Título: Signal Processing by Neural Circuits

Referencia: CSD2008-00028

Título: Structural Biology and Drug Discovery for Malaria Therapeutics

Referencia: CSD2008-00033

Título: Molecular Astrophysics

Referencia: CSD2008-00037

Título: Canfranc Underground Physics

Referencia: CSD2008-00038

Título: Agriculture sustainability in a changing Mediterranean environment. Emergence of viral diseases

Referencia: CSD2008-00039

Título: Development and Application of tools to Facilitate Quantitative Microbial Risk Assessment in foods, minimally processed and ready-to-eat meals

Referencia: CSD2008-00040

Título: Spanish woodlands and global change: threats and opportunities

Referencia: CSD2008-00041

Título: Control and Optimization of Water Networks

Referencia: CSD2008-00042

Título: Advanced Wide Band Gap Semiconductor Devices for Rational Use of Energy

Referencia: CSD2008-00045

Título: Stable Isotopes in Chemical Metrology and Quantitative Proteomics

Referencia: CSD2008-00047

Título: Innovative methodologies to improve groundwater quantity and quality

Referencia: CSD2008-00048

Título: Cognition and Education

Referencia: CSD2008-00054

Título: Micro- and Nano-structured Fiber Optics

Referencia: CSD2008-00055

Título: Hybrid multiresponsive nano, micro and macrogels with technological properties for advanced applications

Referencia: CSD2008-00058

Título: Imagine: Materials at sub-Angstrom resolution

Referencia: CSD2008-00059

Título: CNS lesion repair with a combination of neuroprotective agents, guide substrates and transplants of growth-promoting cells

Referencia: CSD2008-00060

Título: Optimising Nitrogen Use in Mediterranean Agriculture

Referencia: CSD2008-00065

Título: Model Platform for the Development of Antiviral Agents: A Multidisciplinary Approach

Referencia: CSD2008-00066

Título: Engineering Metamaterials

Referencia: CSD2008-00068

Título: Terahertz Technology for Electromagnetic Sensing Applications

Referencia: CSD2008-00072

Título: Future Internet

Referencia: CSD2008-00076

Título: Identification and development of eco-friendly agrochemicals based on allelopathic agents

Referencia: CSD2008-00077

Título: Circumnavigation Expedition Malaspina 2010: Global Change and Biodiversity Exploration of the Global Ocean

Referencia: CSD2008-00078

Título: CORE technologies for future and advanced COMMunication networks

Referencia: CSD2008-00079

Título: Fusion Technology Programme
